Education

National University of Singapore

GRADUATE, BACHELOR OF COMPUTING (HONOURS) IN COMPUTER SCIENCE (CAP 4.29)

Aug 2018 - May 2022

- **Computer Science Coursework:** Algorithms & Data Structures, Object-oriented Programming, Parallel Computing
- **Computer Science Focus Area:** Programming Languages, Parallel Computing

Technical Proficiency

Languages	Java, Typescript/Javascript, Python, C, C++, HTML/CSS
DevOps	Kubernetes, Helm, Istio, Docker, Jenkins, Vercel, Heroku, CMake
Frameworks	Spring Boot, React
Databases	Postgres, MySQL, Clickhouse
Cloud	AWS (EKS, EC2, CloudWatch, Route53, ALB) [Beginner]
Middleware	Redis, Kafka, ActiveMq

Experience

TP Link Pte. Ltd.

SITE RELIABILITY ENGINEER

October 2024 - Present

- Built an existing all in one deployment dashboard comparing blue green deployment metrics, allowing prompt discovery and response that reduced online failure rate due to deployment by 20%
- Managed 70+ microservices across 3 regions and 10 EKS clusters, including 10+ high-throughput services exceeding 100k QPS across 5 product domains
- Jointly migrated over hundreds of millions of database rows from Cassandra Cluster to Mongo Cluster, that streamlined company's tech stack and reduced operational costs by 10%
- Resolved an existing service related thread blocking issue on a microserver that caused persistent SLA availability degradation over 3 months restoring SLA compliance within 72 hours
- Deployed and self-hosted an n8n workflow engine from scratch using FluxCD establishing continuous delivery for internal tooling
- Developing an autonomous Kubernetes remediation tool leveraging agentic AI to automate alert handling *In Progress*

Univers Pte Ltd

BACKEND ENGINEER

June 2022 - October 2024

- Designed and developed a ETL pipeline to aggregate alerts into a ClickHouse database for a site fault detection and analysis dashboard leveraging Java Spring Boot and Azkaban Scheduler, ensuring fast query times within 100ms and robust data handling
- Integrated existing microservices deployed on Kubernetes to monitoring tools such as Apache Skywalking, Graylog and Grafana increasing ease of operations
- Reduced existing technical debt and legacy dependencies in gateway services, via Spring Cloud and enhanced Spring Security simplifying existing authentication flows
- Took over and revamped a legacy backend application, applying critical security fixes, data migration, containerization, and setting up a comprehensive Jenkins CI/CD pipeline from scratch, improving system reliability and deployment efficiency
- Engineered a legacy Go-based ML pipeline that does energy consumption prediction via kubeflow projected to save thousands of dollars in client's energy bills

Univers Pte Ltd

BACKEND ENGINEER INTERN

May 2021 - Oct 2021

- Constructed a new verification tool leveraging Java Spring Boot to check device configuration during onboarding, reducing hundreds of man hours of manual verification by hand
- Extended and built new REST endpoints interacting with PostgreSQL database assisting in alerts and lift management system used for managing 50+ lifts and over 10 building fleets

EduDrift Pte. Ltd.

FULL STACK DEVELOPER INTERN

May 2020 - Jul 2020

- Designed and launched the company's marketing landing page serving hundreds of B2B clients and establishing the brand's online presence
- Implemented a key workflow along with a ticketing platform using Typescript React with Material UI, Formik, Next.js leading up to company's platform release
- Designed an extensible database table in Postgres with TypeORM completed with a Nest Js Backend with sub-millisecond response time

Extracurricular Activity

Improvper Conduct

IMPROVISER, PERFORMER

Jan 2021- Present

- Set Designer for a improvisational Collaboration show with *Modern Schemers*
- Jointly developed show format that was presented in Singapore Improv Festival 2025, Manila Improv Festival 2026
- Group performer for esplanade concourse Flipside 2025, 2026 captivating 100+ audiences
