Education

National University of Singapore

GRADUATE, BACHELOR OF COMPUTING (HONOURS) IN COMPUTER SCIENCE (CAP 4.29)

Aug 2018 - May 2022

- **Computer Science Coursework:** Algorithms & Data Structures, Object-oriented Programming, Parallel Computing
- **Computer Science Focus Area:** Programming Languages, Parallel Computing

Technical Proficiency

Languages	Java, Typescript/Javascript, Python, C, C++, HTML/CSS
DevOps	Kubernetes, Helm, Istio, Docker, Jenkins, Vercel, Heroku, CMake
Frameworks	Spring Boot, React
Databases	Postgres, MySQL, ClickHouse
Middleware	Redis, Kafka, ActiveMQ

Experience

TP Link Pte. Ltd.

SITE RELIABILITY ENGINEER

October 2024 - Present

- Built an all-in-one deployment dashboard comparing blue green deployment metrics, allowing prompt discovery and response that reduced online failure rate due to deployment by 20%
- Managed 70+ microservices across 3 regions and 10 EKS clusters, including 10+ high-throughput services exceeding 100k QPS across 5 product domains
- Jointly migrated 100M+ database rows from Cassandra Cluster to Mongo Cluster, that streamlined company's tech stack and reduced operational costs by 10%
- Resolved a service-related thread blocking issue on a microservice that caused persistent SLA availability degradation over 3 months restoring SLA compliance within 72 hours
- Deployed and self-hosted an n8n workflow engine from scratch using FluxCD establishing continuous delivery for internal tooling
- Developed an autonomous Kubernetes alert remediation tool using n8n agentic workflows and the Kubernetes Go client API, with a local Minikube cluster for end-to-end integration testing"

Univiers Pte Ltd

BACKEND ENGINEER

June 2022 - October 2024

- Designed and developed an ETL pipeline to aggregate alerts into a ClickHouse database for a site fault detection and analysis dashboard leveraging Java Spring Boot and Azkaban Scheduler, ensuring fast query times within 100ms and robust data handling
- Integrated existing microservices deployed on Kubernetes to monitoring tools such as Apache Skywalking, Graylog and Grafana increasing ease of operations
- Reduced existing technical debt and legacy dependencies in gateway services, via Spring Cloud and enhanced Spring Security simplifying existing authentication flows
- Took over and revamped a legacy backend application, applying critical security fixes, data migration, containerization, and setting up a comprehensive Jenkins CI/CD pipeline from scratch, improving system reliability and deployment efficiency
- Engineered new prediction capabilities on an existing python based Kubeflow ML pipeline, including monthly energy forecasting projected to save thousands of dollars in client energy costs

Univiers Pte Ltd

BACKEND ENGINEER INTERN

May 2021 - Oct 2021

- Constructed a new verification tool leveraging Java Spring Boot to check device configuration during onboarding, reducing hundreds of man hours of manual verification by hand
- Extended and built new REST endpoints interacting with Postgres database assisting in alerts and lift management system used for managing 50+ lifts and over 10 building fleets

EduDrift Pte. Ltd.

FULL STACK DEVELOPER INTERN

May 2020 - Jul 2020

- Designed and launched the company's marketing landing page serving hundreds of B2B clients and establishing the brand's online presence
- Implemented a key workflow along with a ticketing platform using Typescript React with Material UI, Formik, Next.js leading up to company's platform release
- Designed an extensible database table in Postgres with TypeORM completed with a NestJS Backend with sub-millisecond response time

Extracurricular Activity

Improvper Conduct

IMPROVISER, PERFORMER

Jan 2021- Present

- Set Designer for an improvisational Collaboration show with *Modern Schemers*
- Jointly developed show format that was presented in Singapore Improv Festival 2025, Manila Improv Festival 2026
- Group performer for esplanade concourse Flipside 2025, 2026 captivating 100+ audiences
